## ABOUT

Fullstack Developer with 4+ years of experience building and maintaining production-grade web systems and mobile applications. Hands-on background in cloud deployments, CI/CD automation, and DevOps practices. Strong command of React.js, Node.js, and TypeScript, combined with agile team collaboration. Career goal: Senior Fullstack Developer & Engineering Manager with deep expertise in DevOps and agile software delivery.

## PROFESSIONAL EXPERIENCE

### Showcase Pro

Mid-level Systems Development Analyst | May 2024 – Present

- Developed and maintained production web systems and mobile applications serving internal and external clients.
- Managed cloud deployments ensuring service availability, scalability, and monitoring.
- Designed and maintained system automations that improved software delivery speed and reliability.
- Led integration workflows with the development team and provided technical support to clients.

### Showcase Pro

Junior Systems Development Analyst | January 2023 – April 2024

- Built and maintained web and mobile applications, accelerating feature delivery cycles.
- Provided IT technical support for internal and external clients, improving average resolution time.
- Participated in code reviews and maintained technical documentation for developed features.

### Showcase Pro

IT Intern | January 2022 – December 2022

- Configured peripherals and provided support for Windows and Linux operating system environments.
- Set up computers and delivered N1 support to internal and external clients.
- Assisted with the implementation of accessibility solutions in production equipment.

## TECHNICAL SKILLS

|                |   |
|----------------|---|
| Front-end      | React.js · Next.js · TypeScript · JavaScript · HTML5 · CSS3 · TailwindCSS   |
| Back-end       | Node.js · Nest.js · Go · Python · REST APIs                                 |
| Mobile         | React Native · Kotlin   |
| Cloud & DevOps | Docker · Docker Compose · Kubernetes · CI/CD Pipelines · Cloud Environments |
| Databases      | PostgreSQL · MySQL · MongoDB · Redis (SQL & NoSQL)                          |
| Other          | Git · GitHub · Figma · UX/UI Design · Scrum · Kanban                        |

## EDUCATION

Postgraduate – Fullstack Development

2025 – 2026

## CERTIFICATIONS

---

- ▶ Frontend Specialist (React.js) – Rocketseat · 2023
- ▶ Backend Specialist (Node.js) – Rocketseat · 2024
- ▶ Agile Manager – Alura · 2021
- ▶ Business Agility – Alura · 2021
- ▶ Additional courses on Rocketseat, Alura, and B7Web platforms

## LANGUAGES & SOFT SKILLS

---

- ▶ English – Intermediate (B1/B2)
- ▶ Spanish – Basic (A2)
- ▶ Portuguese – Native
- ▶ Clear and objective communication
- ▶ Fast learner and adaptability
- ▶ Teamwork & cross-functional collaboration

## LEARNING ROADMAP

---

Deepening mobile development skills with Swift (iOS) and Kotlin (Android) in React Native environment and Rust language for high-performance systems. Expanding expertise in technical team leadership, agile management, and microservices architecture.
